

Isolation for van body

Car bodies like van body can be used to cargo transport in low temperature. Especially it concerns for food or drugs transportation. Essential condition is applying extra thermal isolation and some of products need also a refrigerator. Our bodies have ATP and PZH certificate thanks to that our construction is perfect for food, drugs and other products transportation in specific temperature.

Equipment

- a thermal isolation with external layer from laminate – in accordance with PZH requirement,
- the floor finished with self-horizontal surface.

Some extras

- equipment to secure transported cargo and to protect inner wall's from damage,
- a floor covered with an aluminum anti-skid steel sheet,
- a vent (window),
- a refrigerator (THERMO KING, CARIER) which ensure constant thermal condition for transported cargo.

Additionally

- stick graphics,
- painting advertising inscription on vans, sides and boards,
- radiotelephones UKF/VHP and CB radio can be made to order in cars.
