

Tipper

Light and light-heavy tippers are manufacturing in 2 versions:

- 2 way tipper,
- 3 way tipper,

The floor, flat is made of a steel of increased mechanical resistance which gives a highest durability.

Steel or on aluminium side walls, can be shared into 2 parts, height from 400 mm in accordance with a client wishes. Side walls can be fitted with hinges in upper and lower axle. Front of the body is strengthened and heightened to do driver cabin protection.

In ours tippers we are using servo-motors from famous firms like: Hyva, Penta, Binotta. All steel elements used in our construction are cleaning by metal balls (or sanded). Tipper has the same colour what a car's cabin or colour which is the best for our client.

Plastic mudguards with mud flaps for rear wheels protecting bottom joint.

Lights installed in accordance with traffic regulations and sides equipment for protection and rear distinctive boards.

Tipper control is in a car cabin which ensure comfort and safety service.

An intermediate frame is made of a steel of increased mechanical resistance which gives a highest durability and smaller weight.

An intermediate frame has the same colour what car frame or colour which is the best for our client. We used paint which is unaffected by erasure.

Tipper
